

ADDITIVES FOR

Metalworking Fluids
Industrial Lubricants
Cleaners
Speciality Products

Additiv Chemie Luers **Your Specialist** for Lubricant Additives

We develop and manufacture products, that are as unique as our customers

Besides standard additives for the formulation of concentrates for metalworking fluids and industrial lubricants, we focus on custom-tailored solutions:

- Additives for the formulation of lubricants, cleaners and rust preventatives
- Market leader for customized additive packages enhancing our customers production cost-efficiencies
- Professional and personalised technical advice
- Customer service and flexible logistic support

„Business is made between people“:

This is the guideline that governs our business, together with our guarantee of quality products and business ethics.

Our Company

We are a medium-sized company operating worldwide, driven by our customers needs.

Why choose Additive Chemie Luers?

- **Customer orientation** through the development of tailor-made products in close cooperation with our customers
- **Quality supplier** certified according to DIN EN ISO 9001 (2015)
- **Focus on logistics** with spacious warehousing and extensive tank farm capacity
- **Technology minded** by early recognition of new technological industry trends
- **Steady company** development by ongoing modernisation of facilities
- **Production-oriented** with more than 80 heatable and coolable blending and storage vessels
- **Environmentally friendly** waste management
- **Use of renewable energies** through large photovoltaic panels
